

MULCH & COMPOST FUNDRAISER

PROGRAM DETAILS FOR ORGANIZERS

Tired of the same old candy bar fundraisers? Here's your opportunity to sell something people need while making a positive impact on the environment.

Participating in Garden-Ville's Mulch and Compost Fundraiser allows schools and 501c3 non-profit organizations to raise money while improving local lawns and gardens. By selling Garden-Ville's organic and locally sourced mulch and compost, you not only improve your community's environment, but also encourage neighbors to become more involved in sustainable, green practices.

Here are six easy steps to success:

1. Students sell bags of [Hardwood Mulch](#), [Living Mulch](#) or [Elite Lawn Compost](#) at a price determined by your organization (typically \$5/bag) and collect payment (cash or check).
2. Students give purchasers a receipt with details of their order and information regarding where to pick up their products.
3. Students submit their orders along with the money they've collected to your organization's designated fundraiser contact.
4. Your organization's fundraiser contact places one combined order with Garden-Ville via the **Order Summary Form** and provides payment (cash, check or credit card).
5. Garden-Ville delivers the materials to a designated location on a designated date. (Orders can be ready for pick up two weeks from payment date, as scheduling allows.)
6. Purchasers pick up their mulch and/or compost at your designated pick-up location on the product pick-up date.
